

Kerry Clarke: Sharing the Music

Sharing the Music is a creation of a free resources and link, accessible to local music leaders, groups and individuals, containing Multi-track Music Videos for teaching and for singing along, and also for playing along on the ukulele. The videos were created using the Acapella app which also facilitates online collaboration. The videos feature local faces and create the feeling that participants are singing and playing together, at a time when this is not possible to do safely. The chosen repertoire focused on fun and accessibility. This project offers an online version of making music together.
